Nursery and Green House

Chesley H. P., This is one of the oldest establishments of the kind in the State. It was started by Dr. E. C. Worcester in 1852. The demand, especially in the ornamental department, was small at first, but the steady and rapid increase, soon made it necessary to enlarge plant structures to meet this demand. In some of the thriving villages of this State, where a few only of the families would be induced to purchase plants, a few years ago, and that to the extent of a few dollars only, nearly every family buys more or less, and hundreds of dollars worth are required to supply the demand. In 1863, H. P. Chesley became a partner in the business, and in 1871 purchased the entire stock; rebuilt, and greatly enlarged the green houses, and made valuable additions to his already extensive collection of plants. In passing through his grounds recently, July, 1876, in preparing the accompanying sheet, we find, that although he is still growing fruit trees and small fruit, he is making a specialty of flowering plants. His huge collections, well kept green houses, and beautiful laid out grounds, assure us, not only that he is doing a thriving business, but that he has not mistaken his calling.
